Specialty Coffee Brewing Machine

Product Introduction

Parameter

Name: Specialty Coffee

Brewing Machine

Voltage: 220V

Power: 1350W

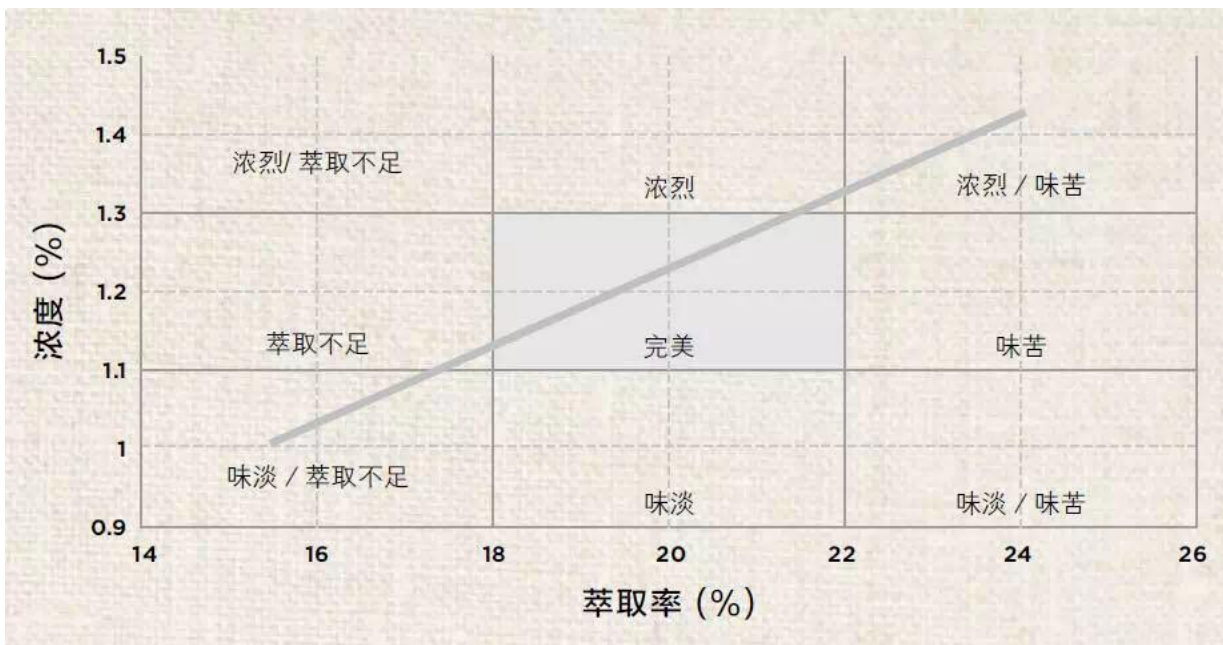

Size: 300*258*320mm

Capacity: 750ml(5 cups)

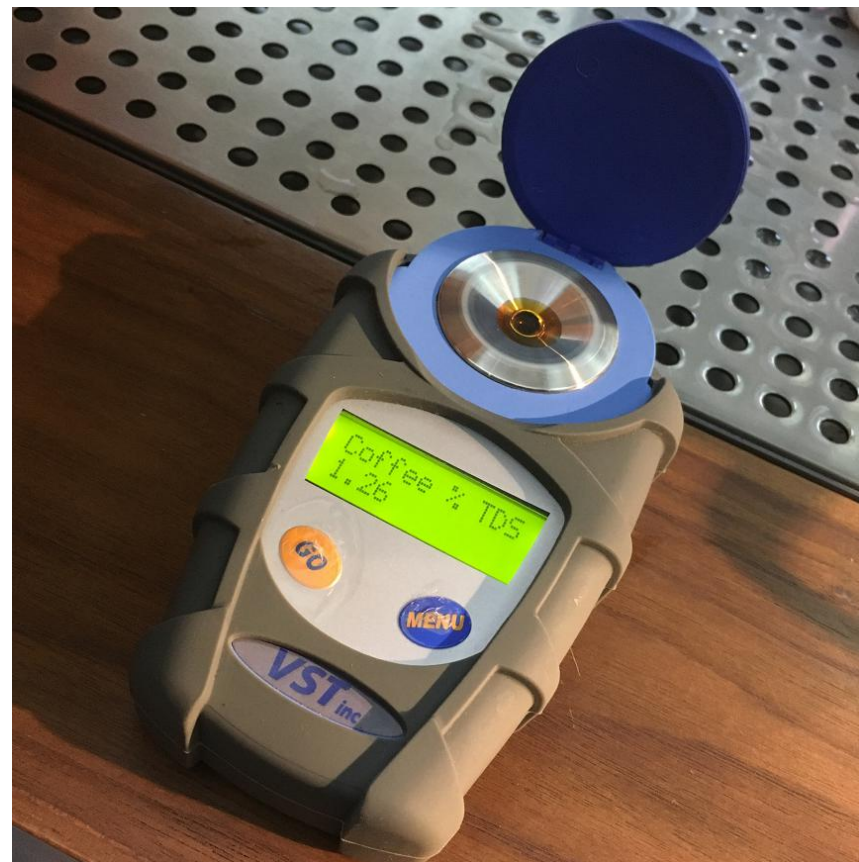

Adopt spiral heating boiler design to improve water discharge efficiency, meet SCA's demand for extraction temperature, and comply with the gold cup extraction law.

According to the experimental test, the TDS value of coffee extracted by this machine is between 1.25 and 1.30.

Recommended Brewing Ratio

1. Coffee

0.4L → 20g coffee powder

0.6L → 25g coffee powder

0.8L → 35g coffee powder

Recommended Brewing Ratio

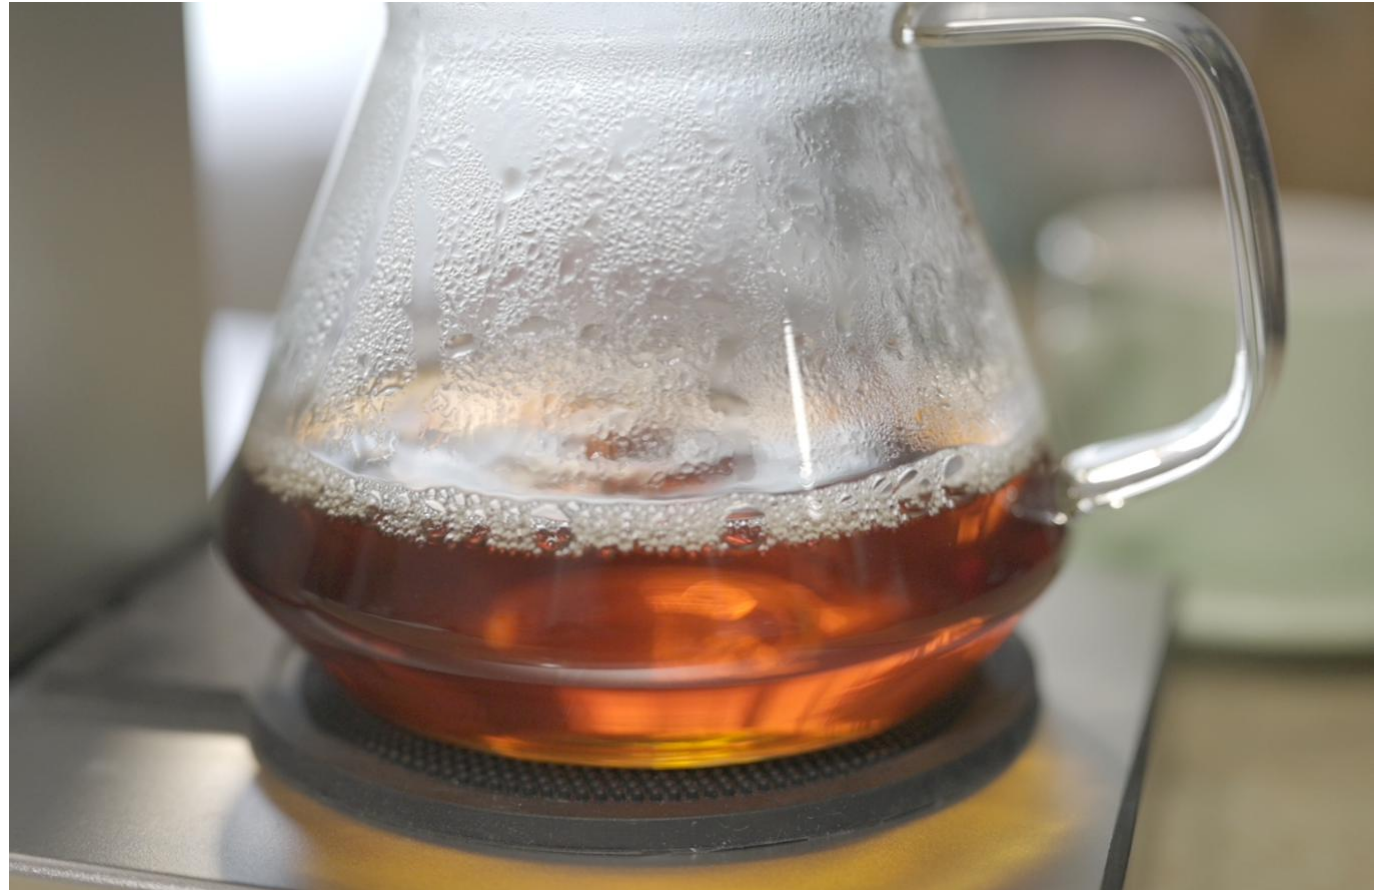

2. Tea

Black Tea:

0.4L → 10g tea leave, infusion 50s

Oolong

0.4L → 10g tea leave, infusion 90s

with the design of 11-hole spray head, it is larger the range of water for brewing coffee thus avoiding partial extraction of coffee.
(Optional stainless steel spray head)

The filter is equipped with manual control switch, which can adjust the pre-infusion according to the coffee beans and produce the flavor comparable to the hand-brewed coffee. At the same time, it can soak the tea leaves and fully stretch and extract them.

Triple safety design. Thermal fuse prevents short circuit, temperature controller avoids excessive temperature, water level sensor makes water tank power off automatically .

Use silica gel pad for heat preservation,
boldly cancel the heat preservation plate,
prevent the second heating of coffee.
(The process of heat preservation is
actually the process of repeated heating.)
